The time has finally come when we realize that we must retire. We have purchased a home near town and are leaving the farm which has been our way of life for many years. Therefore, we must disperse our second herd of Polled Shorthorns which we have assembled and developed since our dispersion in 1966 which makes thirty-seven years that we have been associated with Polled Shorthorns. They have always been good to us and we will miss them.

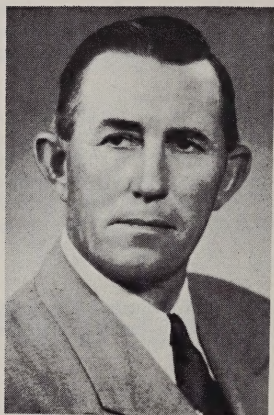

These are good, solid, sound, productive cattle that are acceptable by today's standards that demand size, scale and gaining ability. They have been handled and developed in a practical manner under average farm conditions. They have stamina and are healthy.

Dean Larson, our son-in-law, has been associated with our operation the past four years and will take over the large farming operation but cannot handle both the farming and the cattle.

We believe in these cattle and are willing to recommend them to anyone.

We hope to see you at Gowrie on December 12 and know that many of these cattle will please you.

OTTO JOHNSON

OTTO JOHNSON

1964 "Builder of the Breed"

(From the August 15, 1964 Special

Issue of The Shorthorn World with

respect to being so honored.)

"Otto Johnson, Lohrville, Iowa is another example of the great American agricultural success story. Born and reared in Sweden, he came to the United States at the age of 19. He founded his Polled Shorthorn herd thirty years ago and has worked conscientiously at the job of producing breed improvers ever since.

His record of grand champions and top-selling bulls at the Omaha sale, largest Polled Shorthorn bull sale in North America, stands for all in the future to shoot at. The success of his cattle in the hands of others proves again that much of the breed's finest seed stock is produced in select, rigidly culled herds maintained as a family enterprise on the average-sized American farm."

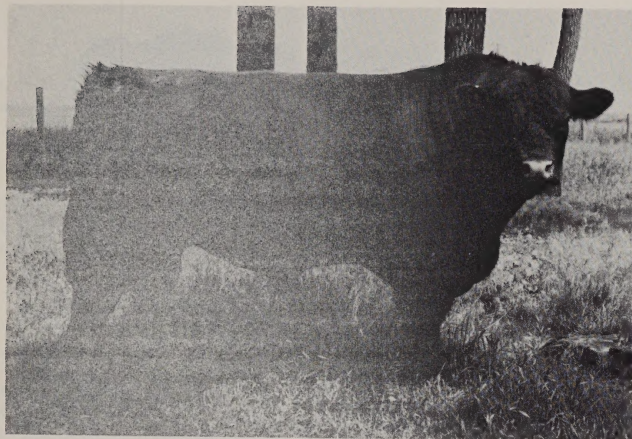

With respect to the above, no honor was more richly deserved nor could the reasons for the recognition have been better said. This was said nine years ago but the reasons are just as valid today as they were then.

In 1966 Otto Johnson held a dispersion sale which was a successful event with the cattle going to many states. At the time he was planning to retire and visit Sweden, his native land which he had not seen for more than forty years. After his return, the call of the land and production of cattle was too strong to resist. So in 1967 he was back farming and buying Shorthorns. He selected good, sound, producing cattle with size and substance. This herd grew rapidly as indicated in this catalog which numbers 133 head.

In 1969 Dean Larson, a son-in-law, became associated with the Johnson operation. Now Otto Johnson is leaving the farm and Dean Larson will take over. However, he is in no position to handle both the farm and the herd. Therefore, this good, sound, practical, producing herd is being dispersed.

Here are real good Polled Shorthorns that will do well for their new owners. So be at Gowrie, Iowa, on December 12 and avail yourself of the many real buying opportunities.

STANDARD GUARANTEE

Recommended by American Shorthorn Association

- A. Proper care must be given by purchaser to protect breeding qualities and health of guaranteed animals.
- B. All bulls are guaranteed breeders, provided they are not allowed to serve when under 14 months of age, or allowed to run with the herd when under 20 months of age. In case of failure of a bull to be a breeder, notice shall be given to the seller within six months of date of purchase, or by the time the bull is 20 months of age, if purchased under 14 months of age.
- C. With the exception of heifers sold under 14 months of age, all females are guaranteed breeders. Heifers under two years of age, shall not be served by a heavy or old bull. Cows or heifers sold as bred, or safe in calf, not proving to be in calf must be reported to the seller within three months after date of sale. Females over 14 months of age sold open, not settling within six months after date of sale, shall be promptly reported to the seller.
- D. When an animal fails to comply with the above guarantee the seller has the option of substituting an animal of equal value to the satisfaction of the purchaser, or of having the animal returned for a trial for a period not to exceed six months. The expense of freight in such case is to be paid by the seller. If the animal is then proved to be a breeder beyond doubt it shall be returned to the purchaser at his expense. In case of dispute the return of the full purchase price, without interest, to the buyer will be considered full settlement and satisfaction to all claims. No charge for feed or maintenance shall be made by either buyer or seller. Salvage shall go to the seller. It shall be understood that the same guarantee given for the first animal shall likewise apply to any animal later substituted.
- E. In the event an animal is returned by the buyer to the seller as a non-breeder the buyer must furnish to the seller a veterinarian's certificate showing that his herd is healthy if such a certificate is required by the seller.
- F. All animals cataloged have been tested for T. B. and are clean, and have also passed a test for Brucellosis thirty days prior to the sale, or are accompanied by a Bangs Vaccination Certificate. Announcements will be made covering animals not clear from vaccination.
- G. Certificates of registry and transfer will be furnished with each animal sold. A signed pedigree application for unborn calves should be furnished with bred females showing names and record numbers of sire and dam, as well as service date.
- H. All prospective buyers should check health requirements of their states. Health certificates will be provided with each lot sold.
